

Institute Distinctiveness

Rajdhani College of Engineering and Management (RCEM) has been in existence for over last three decades offering Management Programme. Even though the college has a modest beginning it has been successful in its mission to create good human being with necessary skills to solve life challenges and to make their places worth living with happiness, universal brotherhood and mutual cooperation. Our involvement for providing the best of academic ambience has been well praised and accepted by all quarters such as the students, teachers, staff, the parents of the students and lastly the employers. Different meets are organised round the year for all such stakeholders. The objective of such meet aims at the overall growth of the students as they voluntarily participate in all events with zeal and vigour. Whether it is an academic club function or annual day celebration or Yoga class or community work, our students take the lead. The faculty and students relation is priceless. That's why we have not seen any kind of tiff or misunderstanding among the senior and junior students during past years. Absolute discipline is our mantra in this college.

The college has been trying its best to provide best of services to the students with whatever means it has. We feel proud of the students, teachers and staff we have at RCEM. Eminent academicians are the constant guiding post of the college. WE believe, RCEM will stand out as an institute of repute one day.
